Jordan Walkley

FULL STACK WEB DEVELOPER

P: 0478 589 545 **E:** jjwalkley@gmail.com **W:** jwalk00.github.io

CAREER OVERVIEW

I am a full-stack developer with over 10 years experience in the industry, working extensively with various tech stacks. At the beginning of my career, I undertook several web internships at agencies throughout Brisbane and, after graduating, I began working as a full time web developer. With knowledgeable mentorship, I gained valuable skills and my interest in the web industry increased.

Working locally and overseas has provided a diverse range of experience in unique work and life cultures. Full time educational work, with freelance development jobs on the side, allowed me to explore an interest in teaching, which would later lead to a web design tutoring role at the University of Queensland when back in Australia. I later took on a senior front-end developer job then progressed to senior full-stack and developer positions, undertaking increasingly challenging roles. Within a senior capacity, I have been involved in strategic discussions regarding product offerings, provided key technical advice to steer the direction of business decisions and managed staff while collaborating with multiple teams.

PROFESSIONAL SKILLS

Coding JavaScript (ES6), JSON, .NET, PHP, HTML5, CSS3 (+ SCSS), Python, MySQL, REST APIs

FULL STACK WEB DEVELOPER

P: 0478 589 545 **E:** jjwalkley@gmail.com **W:** jwalk00.github.io

EMPLOYMENT EXPERIENCE

SENIOR WEB DEVELOPER — 2025 - ONGOING

Department of the Premier and Cabinet (Contract)

- Maintained over 40 Squiz Matrix DXP and .NET public-facing websites, providing department communications in accordance with relevant standards and the Queensland Government Design System.
- Built a secure website facilitating a state-wide campaign and voting system utilised by 300,000+ users.
- Automated complex processes to reduce manual handling, one of which was 400% more efficient.
- Liaised with various Government Department contacts to manage tasks related to public websites.

SENIOR FULL STACK DEVELOPER — 2024 - 2025

IONYX Digital

- Coded and maintained over 60 responsive, WCAG accessible React based web applications and sites for enterprise-level clients with a focus on best practice and user-centred experiences.
- Led the strategic process refinement of a product offering, producing a 55% increase in efficiency.
- Consulted with stakeholders to define information architecture and design content strategy.
- Provided technical advice to the sales/design departments, facilitating ideal solutions for clients.
- Collaborated with multidisciplinary teams to complete projects, resulting in a 600% ROI for a client.
- Managed junior developers, guiding them to full time roles post internship and stimulating business growth.
- Trained clients post site launch, ensuring external product management was possible.

FRONT END WEB DEVELOPER — 2021 - 2024

Pixel Palace (Full Time)

- Decreased project build time using Gutenberg's codebase to develop a custom, scalable base theme.
- Utilised reusable components to create consistent, large-scale, content-driven websites.
- Integrated APIs, analysed site analytics, defined processes and wrote effective documentation.
- Analysed website data reports, informing refinements for products and improving client satisfaction.
- Coded slick web animations with CSS, JavaScript and GSAP to create impactful, engaging experiences.
- Became proficient with Figma, creating custom wireframes/designs as inspiration for builds.

WEB DEVELOPER & UX/UI DESIGNER — 2019 - 2021

Self Employed

- Developed websites in various industries, several of which reach over 25,000 monthly unique users.
- Diversified skillset to individually run a business and grew my understanding of B2B activities.

WEB DEVELOPER — 2015 - 2019

iCreate Agency

- Created client websites from designs utilising WordPress and HTML, CSS, PHP and JavaScript.
- Learned about hosting and domain services, Node.js, npm, Webpack, Gulp and Git version control.
